

**Amendments to the Specification:**

Please delete Paragraph 39 and replace Paragraph 69 with new Paragraph 69 shown below:

[0069] The antenna structures in accordance with the principles of the present invention may be made by any means known in the art such as the use of traditional circuit printing. Another alternative method for fabricating an antenna in accordance with the present invention, can include etching an antenna on metallic film that is then molded in plastic rather than etching the antenna pattern on a printed circuit board. The resulting structure may be attached in various ways to a circuit board or to a device enclosure.
